

ECOSPEED®

PERFORMANCE AND PROTECTION

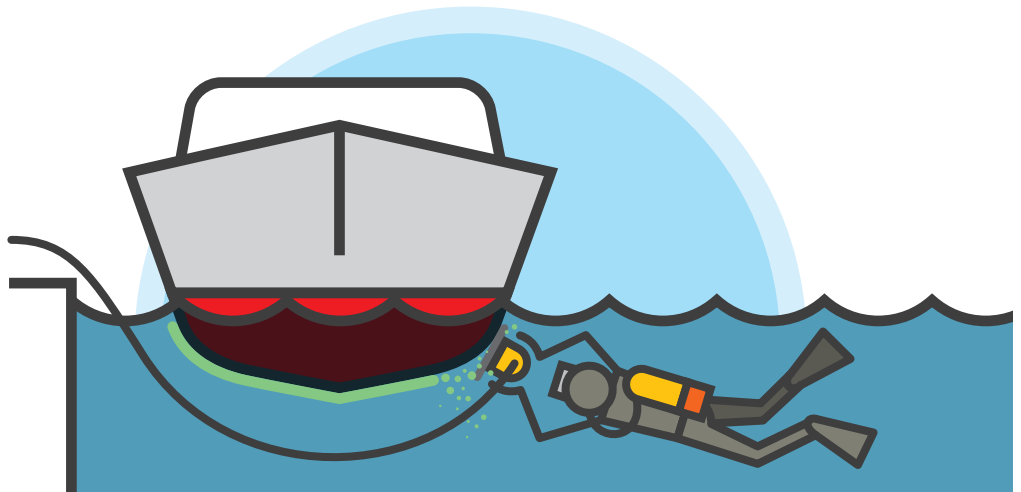

Washing in the boatlift

A boat that has Ecospeed on its hull can be washed very quickly in a marina's boatlift.

Underwater washing

Fouling can also be removed fast and easy underwater by a diver with the correct equipment.

Washing from the jetty

A third option is a specially designed machine that allows very efficient cleaning from the jetty.

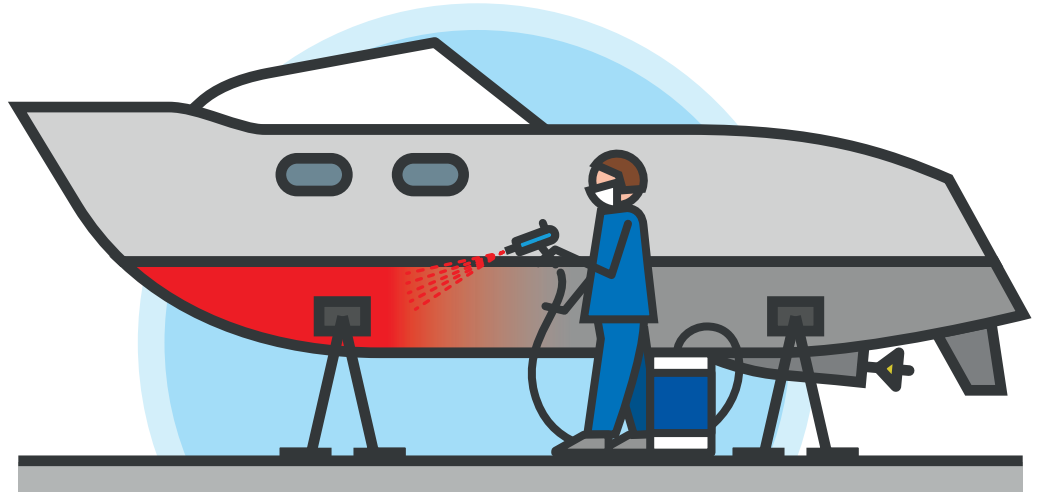

Always a clean boat

ECOSPEED®

PERFORMANCE AND PROTECTION

Onetime application

Ecospeed can be applied very fast and easy. This non-toxic coating system stays on the hull for the entire lifetime of the boat.

Lifelong enjoyment

You will not have to worry about the underwater hull of your boat ever again. Time you spend on deck will become leisure time again. What is more, the environment will thank you.

Always a clean boat
